

HYDRO CART

WATER DISPENSER WATER FILL SYSTEM

The Hydro Cart is a mobile water carrier with a built-in pump and battery, that enables you to transport water to anywhere in your facility. It is designed to be used with a watering nozzle*, making it an ideal addition to your packaging or fulfillment operation.

The Hydro Cart's simple but rugged design makes it reliable and easy to use. Simply fill the cart with a suitable source of water, wheel it to your pack station and fill your water-activated tape dispenser or case sealer bottles. As standard, the Hydro Cart is supplied with a quick connect fitting. Adapters are available if other types of fittings are required.

*Nozzle sold separately.

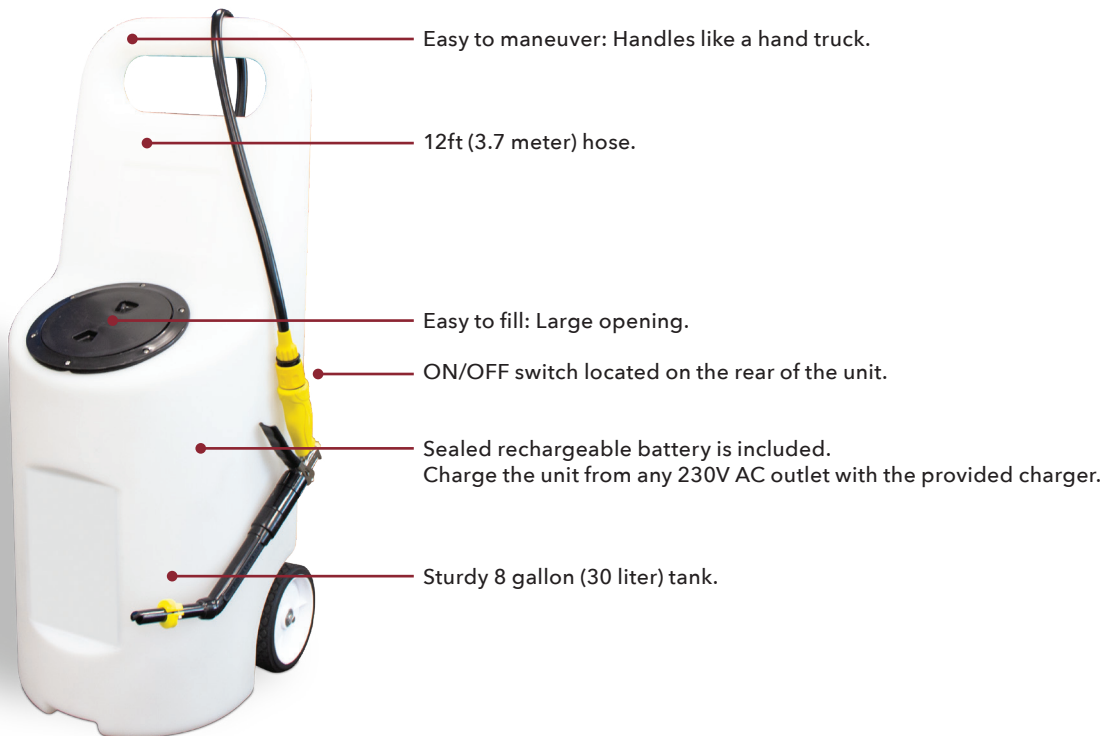

MACHINE FEATURES & BENEFITS

- Large capacity, sturdy 30-liter tank
- Compact size
- Two-wheel configuration
- Built-in 12 volt sealed rechargeable battery
- Fully automatic battery charger
- Shipped ready to use

PRODUCT ATTRIBUTES

CHARACTERISTICS	HYDRO CART
ELECTRICAL	
Cart Operating Voltage	12V
Current Consumption	7.5A
Nominal Power Consumption	90W
Onboard Power	12V 7Ah maintenance-free battery
Charger Operating Voltage	230V 50Hz UK 3-pin plug
GENERAL	
Part Number	Hydro Cart: PHS-CRT-12V Watering Nozzle: GUN-X HYDRFILL
Tank Capacity	8 gallons (30 liters)
Weight	24 lbs (12.8 kg)
Dimensions (L x H)	15" x 36" (38.1 cm x 91.4 cm)
Minimum Pressure	15psi
Maximum Pressure	25psi
Max Flow	1.85 gallons (7 liters) per minute
Output Hose Length	12 ft (3.7 meters)
CONTROLS	
Cart ON/OFF	Rocker Switch – Pump turns on and off by demand on falling or rising line pressure

Hydro Cart and nozzle sold separately.
