

# TT-400™ VERTICAL CARTONER

## Automatic Vertical Cartoner

The TT-400 is a continuous motion top load cartoner that can reach speeds of up to 750 CPM. It is available with MemoryTrack for computer scale interface or with Patented UltraTrack high-speed volumetric cup filler that provides no-carton/no-product, no-product/no-carton functionality.

The TT-400 cartoning machine is also suitable for lined cartons - a substitute for cumbersome and outdated bag-in-box formatting. TT-400 for lined cartons can prepare the liner, seal the bottom liner, fill the box, and seal the top liner. Besides that, it can reach a speed of 200+ cartons per minute.

### TOP-LOAD CARTONER

**QUICK CHANGEOVER**

**COMPACT FOOTPRINT**
